SUPER SPEED RACE JR. has been designed exclusively for small children in respect to the game features and cabinet size; compact cabinet with a 14-inch monitor.

The game is fitted with the Steering Wheel and Accelerator; there is neither Shift Lever nor Brake; the engine brake functions effectively.

HOW TO PLAY THE GAME

* The player selects the difficulty level (4 stages) by pressing the button.
* The player tries to reach the goal within a given time frame.
* Slight contact with any other cars, motorcycles, roadside fence, etc. slows down the speed of the player's car; a hard collision explodes the player's car.
* The player stops his car at the red light of the traffic signal (at crossroads or railroad crossing) or at the signboard indicating a pedistrians' crossing. If the player fails to do so, a traffic policewoman appears blowing a whistle.

* When the siren sounds, the player must keep in the left lane as the ambulance passes by on the right.

Length :	1,600 mm	(approx. 63 inches)
Width :	600 mm	(" 23-1/2 inches)
Height :	1,102 mm	(" 43-1/4 inches)
Power Consumption:	91 watt	

The features and specifications mentioned above are subject to change for improvement without prior notice.
